

Vibiemme
Sistemi per caffè espresso

DOMO BAR

The Domobar from Vibiemme leads the way in espresso machines for home users. Vibiemme launched the Domobar in 1983 as the first home espresso machine with commercial performance. The Domobar features the patented, original E61 group head, which is user friendly and has excellent heat characteristics resulting in superb quality espresso based coffees.

Setting the Domobar apart from many other home espresso makers is the patented Vibiemme commercial size E61 group head that allows this unit to produce exceptional espresso extractions.

For a good looking, well designed, and fully functional home espresso maker the Domobar is the perfect choice!
